Software Engineer | Frontend Architecture | Enterprise Healthcare Platforms

Frontend engineer building large-scale healthcare platforms at CVS Health supporting Aetna member experiences. Proven ability to deliver high-impact features, mentor engineers, and collaborate cross-functionally with product and architecture partners to ship reliable software used by millions.

Experienced in React ecosystems, distributed micro-frontend architectures, CI/CD systems, and observability practices. Recognized for improving engineering productivity through automation, documentation, and emerging AI solutions while fostering strong team collaboration and stakeholder communication.

Technical Skills

Languages - JavaScript, TypeScript, Python, SQL, GraphQL, HTML, CSS

Frontend & Backend - React, Next.js, Redux, React Query, Node.js, Express

Data & APIs - PostgreSQL, MongoDB, GraphQL, REST APIs

Architecture & Platforms - Micro-frontends, AWS, distributed systems, CI/CD pipelines

Testing & Quality - React Testing Library, Jest, Playwright, automated testing strategies

DevOps & Observability - GitHub Actions, CircleCI, New Relic, Snyk

AI & Emerging Technologies - Claude agents, prompt engineering, engineering productivity automation

Professional Experience

Software Engineer II | CVS Health / Aetna

June 2022 – Present

Frontend engineer and technical leader contributing to large-scale member-facing healthcare applications supporting millions of users across the Aetna platform.

Engineering Leadership

- Serve as a technical mentor for newer engineers, supporting onboarding, architecture comprehension, and knowledge transfer across the team.
- Conduct pull request reviews across multiple teams to maintain code quality and alignment with engineering standards.
- Present sprint progress, architecture decisions, and new feature implementations to product managers and cross-functional stakeholders.
- Regularly contributes more than 25% of total team delivery output within a four-engineer team while supporting collaboration and team velocity.
- Participate in release rotations managing container deployments and micro-frontend releases.

Platform Development & Delivery

- Build scalable React and TypeScript applications used by millions of healthcare members.
- Develop and maintain GraphQL-integrated front-end services within a micro-frontend architecture.
- Collaborate closely with product, design, and architecture teams to implement new digital member experiences.

- Contribute to cross-team initiatives including guided release workflows and shared infrastructure improvements.

Engineering Excellence

- Maintain 90%+ automated test coverage using React Testing Library and Playwright.
- Support CI/CD pipelines and release workflows through GitHub Actions and CircleCI.
- Monitor application performance and API reliability using New Relic dashboards.
- Contribute to production stability through monitoring, incident response, and rapid hotfix deployment.
- Manage security vulnerability remediation for service repositories.

Engineering Productivity & AI Innovation

- Developed internal Claude AI agents used across the engineering organization to automate engineering workflows.
- Built an agent that automatically migrates Redux Sagas to React Query, accelerating modernization initiatives.
- Created AI-powered documentation tooling that generates feature documentation including API dependencies, UI states, and component relationships.

Full Stack Tutor & Grader | 2U / edX

Mar 2022 – May 2022

Supported students enrolled in a rigorous full stack development program.

- Mentored students weekly on software development concepts including frontend frameworks, backend systems, and database architecture.
- Provided structured feedback on coding assignments and guided struggling students toward successful project completion.
- Managed student schedules, communications, and technical support.

Territory Sales Manager | Manufacturing Repair and Overstock

July 2020 – April 2022

Business development leader responsible for customer acquisition and revenue growth across multiple states.

- Generated \$580,000 in new revenue in one year through strategic customer relationship development.
- Built and managed a pipeline of over 100 daily customer interactions across four states.
- Developed more than 50 new customer accounts in the first year.
- Recognized for multiple high-performance months exceeding \$100,000 in sales.
- Developed strong negotiation, communication, and stakeholder relationship skills.

Education

Bachelor of Science — Marketing

University of Arkansas

Full Stack Web Development Certificate

University of Denver / 2U / edX
